

DISCLOSING THE POTENTIAL OF RESPONSIBLE RESEARCH AND INNOVATION IN THE MARINE SECTOR AND BLUE GROWTH SOCIETAL ACTORS AND POLICY-MAKERS PERSPECTIVES

Policy Workshop, Brussels 23 May 2018 - 14.30 -17.30

In 2017 and 2018 the **MARINA** project mobilized more than **1000** societal actors and **120** policy-makers around Responsible Research and Innovation (RRI)

The project acquired from EU societal actors **hundreds of proposed actions** related to Societal Challenges and Marine issues

Policy-makers from 16 different Member States shared with us their opinions on **barriers and actions** needed to institutionalize RRI

MARINA is developing an **RRI Roadmap** of best practices to facilitate and enable the adoption of RRI in the Marine sector and in R&I

We welcome the opportunity to share the results of this effort with you and invite feedback from you as policy-maker, implementer or R&I practitioner on how best to contribute to the current policies, cross-cutting priorities and R&I agenda

| Agenda | 23 May 2018 |
|---------------|---|
| 14.00 – 13.30 | Registration |
| 14.30 – 14.35 | Welcome and self-introduction of participants |
